Technology To Help You Thrive

TechThrive
exists to develop
technology
that best serves
people and
the things that
matter to them.

ABOUT TECHTHRIVE

Using the Internet of Things, TechThrive exists to solve complex problems with simple solutions by developing technology that best serves people and the things that matter to them..

As businesses begin to understand the inherent potential within the Internet Of Things (IoT) and learn to embrace the possibilities of Machine Learning and Artificial Intelligence (AI), TechThrive helps to bolster technological adoption.

TechThrive makes it simple for businesses to solve complex problems, using relevant, advanced technologies.

A high-level technology integrator, TechThrive turns the often intangible concept of IoT technologies into tangible, purposeful solutions

that improve your quality of life, and advance your business objectives.

The most complex of problems is most often solved with the least complex solution.

Implementing flexible hardware and software solutions, TechThrive works with you to discover cost-effective solutions that solve your business problems. Maximising battery life, enabling efficient connectivity, and ensuring your solutions are primarily maintenance-free, TechThrive takes the business-friendly, practical approach, without compromising on quality.

Backed by large-scale manufacturing facilities, that can produce more than 50 000 units per product range, every year, TechThrive's portfolio

is constantly expanding. Fully automated device setup makes implementation and delivery fail-proof, efficient, and simple. With final assembly conducted in South Africa, TechThrive's products are cost-effective.

Using the ever-expanding knowledge of senior technical staff, TechThrive's support channels guide each client through implementation and functional phases, with a keen eye focused on the future. The TechThrive team works with each unique business case, to uncover potential new avenues of implementation, and reveal new business opportunities, enabling clients to expand their service and product portfolios.

“BACKED BY LARGE-SCALE MANUFACTURING FACILITIES, THAT CAN PRODUCE MORE THAN 50 000 UNITS PER PRODUCT RANGE, EVERY YEAR, TECHTHRIVE’S PORTFOLIO IS CONSTANTLY EXPANDING.”

MEET THE TEAM

GAVIN LEVENSTEIN — CEO

After devoting 15 years towards building up a successful business and selling it in October 2018, Gavin shifted his focus onto his key passion: technology. Using appropriate, effective technologies to increase business efficiencies and reduce costs, Gavin is a strategic thinker and renowned business consultant. Gavin's particular interest lies in systems and technologies that streamline operations and improve productivity levels. Gavin believes that IoT systems and devices are the way of the future, and a gift for the present.

ANDREW MEYEROWITZ — TECHNICAL DIRECTOR

Spending nine years at the coalface of product design and management for a well-known South African electronics manufacturer stood Andrew in good stead, when he set off to launch his own company. Designing devices from the ground up, Andrew's experience and knowledge has enabled the development and deployment of millions of products, serving multinational companies, factories, public institutions, and more.

WHAT IS THE INTERNET OF THINGS?

The Internet of Things (IoT) is a network of Internet-enabled devices that allows an object or person to autonomously communicate back to a server to be monitored and analysed. IoT devices can measure and track just about anything, including temperature, movement, location, and more. Using IoT devices can improve your business operations and advance your team's capabilities through real-time, accurate monitoring.

HOW HAS THIS INSPIRED TECHTHRIVE?

Guided by his personal experiences as a pet owner, Gavin Levenstein began investigating useful solutions that helped him and his family

monitor their cats' movements. With IoT technologies in their nascent stages, combining this need for security and mobility made sense to Gavin. He repurposed two smartwatches and attached them to the cats' collars. Disappointingly, these makeshift devices had to be recharged after just two days, and the tracking capabilities proved inefficient. Upon meeting Andrew, an Electronic Engineer with several years of IoT experience, the duo set to work on designing and developing IoT-powered practical solutions to common lifestyle and business problems.

Providing IoT-powered practical solutions to common lifestyle and business problems.

HOW TECHTHRIVE CAN BENEFIT YOUR BUSINESS

- Designs and implements flexible, responsive software and hardware that solve your complex problems, simply.
- **Helps your business grow, with backing from TechThrive's large-scale manufacturing facilities.**
- Provides fully automated setup facilities, supported by efficient delivery systems, and responsive support channels.
- **Reduces your business' operational costs, by passing on manufacturing cost savings to you, the client.**
- Helps you find new ways to expand your product and service portfolios.
- Enhances your customers' experience, through the provision of real-time, relevant data.
- **Upholds stringent safety standards and decreases operational risk, with instant, responsive asset and equipment monitoring tools.**
- Optimises resource management and utilisation, through accurate, real-time monitoring and measurement.
- **Eliminates human error, using IoT devices and technologies that don't make mistakes, and don't take a lunch break.**

Introducing solutions
by TechThrive that
implement, optimise,
enhance and automate,
to promote your
business' growth, reduce
operational costs and
improve accuracy and
safety standards

Technology To Help You Thrive

TECHTHRIVE'S PRODUCTS

1. Panic Button

- Immediately alert your loved ones in an emergency.
- Ideal for the elderly, athletes, and people on the move.

2. Pool Monitor

- Instant alerts for pool water disturbances or temperature changes.
- Prevent swimming pool accidents and injuries.

3. Room Temperature Monitor

- Comfort and temperature monitoring for home and business.
- Track temperature data in real-time, optimising as you need to, reducing your utility bills and carbon footprint.

4. Door, Safe & Window Monitor

- Receive instant alerts if a door, safe, or window is opened.
- Protect your assets and valuables, and remove the need for additional security monitoring.

5. People Monitor

- Especially useful for the elderly and children.
- Fall monitoring, instant GPS location monitoring, activity tracker & panic button.

6. Pet Monitor

- GPS location monitoring.
- Ultra long battery life.

7. Laptop Tracker

- Monitor and track laptop location to prevent loss.
- Micro device attached to the interior of your laptop.

ADDITIONAL SERVICES AND PRODUCTS DEVELOPED AND PRESENTED BY TECHTHRIVE

Educational Seminar

- Understanding IoT and how it works for your business.

Internet and Connectivity Backup Power Supply

- Liberate your business from loadshedding.
- Direct Current power supply to power your Internet-enabled devices.
- 2 x 12v standard connectors, including adaptors for all devices.
- Ultra long battery life and run time.

Digital Screen

- Digital screens for marketing displays, waiting rooms, and information boards.
- Remote management of screens.

Specialist Customisation & Development

- One-of-a-kind software and hardware solutions, built to unique specifications and requirements.
